Summary

Java Full Stack Developer with 4 years of experience building scalable enterprise applications using Java, Spring Boot, Microservices, REST APIs, and React. Hands-on experience with Generative AI, GitHub Copilot, Claude Code, and Agentic AI concepts to enhance development productivity and code quality. Strong collaborator with experience working in Agile teams to deliver high-quality software solutions.

Skills

- **Languages:** Java 8, JavaScript, SQL
- **Frameworks & Libraries:** Spring Boot, Spring Security, React, REST APIs, JUnit, Mockito
- **Cloud & Messaging:** AWS, Kafka
- **Databases:** Oracle DB, Postgres, MySQL
- **Tools & Platforms:** Git, Maven, IntelliJ IDEA, Postman, JIRA, Jenkins, SonarQube

Experience

Infosys – Associate Consultant | Java Developer **SEP 2025 – Present**

Project : TTax – Transactional Tax Reporting System

Tech Stack: *Java, Spring Boot, JUnit, Mockito, SQL, AWS*

TTax is a financial reporting application developed for processing and reconciling stock exchange trade data. It automates trade data ingestion, stamp duty calculation, and report generation, ensuring regulatory compliance and audit readiness.

- Developed and deployed 10+ RESTful APIs, improving system scalability and reducing code complexity by 50% using Java 8, Spring Boot, JPA, and SQL
- Migrated 5+ legacy APIs to modern frameworks, improving application performance by 80% and scalability by 20%
- Designed APIs to generate reports on tax calculations, reducing manual effort by 100%
- Migrated services codebase to Spring Boot 3.0+ and Java 17, reducing dependency issues by 100% and vulnerabilities by 50%

Tata Consultancy Services – Systems Engineer | Java Developer **AUG 2022 – AUG 2025**

Tech Stack: *Java 8, Spring Boot, Spring Data JPA, Spring Security, JWT, JUnit, Mockito, SQL*

A web application enabling role-based training assignment, progress tracking, and compliance reporting across the organization.

- Architected and implemented client-specific microservice features using Spring Boot, translating business requirements into scalable backend functionality
- Implemented Spring Security with JWT-based, role-based authentication and authorization, securing API endpoints across multiple user roles (ADMIN, SME, EMPLOYEE)
- Designed and documented RESTful APIs using Swagger/OpenAPI, streamlining integration and reducing API onboarding time for consuming teams
- Built unit and integration test suites using JUnit and Mockito for service and controller layers, achieving high test coverage and reducing production defects

Education

Govt. College Of Engineering, Yavatmal. **JUNE 2018 – JUNE 2022**
Affiliated to Dr. Babasaheb Ambedkar Technological University
B.Tech In Computer Engineering **CGPA: 9.5/10**

Certifications & Achievements

- **AWS Certified Cloud Practitioner** – Amazon Web Services
- **Best Team Award (2023, 2024) at TCS:** Recognized for outstanding work and continuous support on the project, contributing to overall team success and delivery excellence.
